# EU and UK REACH Declaration

## Registration, Evaluation, Authorisation and restriction of Chemicals (REACH)

The European Union (EU) REACH Regulation (EC 1907/2006) aims to ensure a high level of protection for human health and the environment from the use of chemicals. It makes the people who place chemicals on the market responsible for understanding the risks associated with their use. Under the European Union (Withdrawal) Act 2018, the EU REACH Regulation was brought into the UK law on 1 January 2021 and is known as UK REACK. REACH, and related legislation, were replicated in the UK with the changes needed to make it operable in a domestic context. The UK REACH and the EU REACH regulations operate independently from each other.

This EU and UK REACH declaration applies to products manufactured and supplied by 7 Steel UK.

We can confirm that products supplied by 7 Steel UK are classified as ‘articles’. Additionally, none of the substances in the current EU and/or UK REACH Candidate list of Substances of Very High Concern (SVHC) are present in a concentration above 0.1% weight by weight in any of the products we supply. Therefore, 7 Steel UK products do not need to be registered under EU and UK REACH.

We identify the substances that we use in the course of our activities and engage with suppliers to seek their confirmation of compliance with the registration requirements of REACH. Any substances or preparations used in the course of our activities are employed in accordance with the risk management measures identified by the supplier.

7 Steel will continue to monitor the EU and UK SVHC candidate list and update customers and downstream users where relevant.

On behalf of 7 Steel UK.
